

SHOPCOOL®

SC3500

Simple and Economical Portable Evaporative Cooling

The ShopCool® portable spot cooler is the perfect solution for hot garages, workshops, and even patios – any place you need personal spot cooling of the air near you. It's easy to operate and requires no installation. Just attach a garden hose to the self-regulating water float valve, plug it into a

standard electrical receptacle, turn it on and experience immediate cooling. And with its rugged, heavy-duty wheels you can conveniently move it from one hot spot to another.
