### WARNINGS

instructions carefully as they contain important information about safety, and maintenance of the product.

RTANT: READ THIS MANUAL THOROUGHLY AND KEEP IT WITH CARE UTURE REFERENCE.

These instructions are as a life in the same and the same are as a life.

the instructions carefully as they contain important information about safety, and maintenance of the product.

ORTANT: READ THIS MANUAL THOROUGHLY AND KEEP IT WITH CARE FUTURE REFERENCE.

These instructions are an integral part of the product and, throughout the entire life of the product, must be kept and be available. The documentation should be given to the subsequent owners of the product.

Attention: this coffee maker requires a heat source for its operation and develops pressure inside. Failure to comply with the instructions may cause the risk of burn or the coffee maker burst.

Before each use, make sure the coffee maker is not damaged and is complete with all its parts. In case of doubts, contact the dealer or the manufacturer. Remove the packaging materials of the coffee maker and any warning inside it before use.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.

Keep out of reach of children.

Use the coffee maker for the purpose that it was designed for. The product is intended for household use only.

Do not leave the appliance unattended during operation.

Do not leave the appliance unattended during operation.

Do not buch the hot surface of the coffee maker. The surfaces get hot, therefore use the handle (1) to move the orffee maker.

Never use other liquids in the heater or the upper part, the coffee maker is intended to be used with water only.

The coffee maker is designed to be used only with water and ground coffee for Moka for household use: do not use other products (e.g. barley, cood, coffee extracts, tea, COFFEE FOR PERCOLATING FILTERS OR ESPRESSO MACHINES, etc.).

Make sure the steam jet is oriented far from the user, by ensuring the safety valve is not oriented towards the user.

Do not leave the coffee maker in the heat source for too long to prevent any change in colour.

Make sure the steem jet is oriented far from the user, by ensuring the safety valve is not oriente

In case of malfunctioning, do not use the product and contact the dealer or the manufacturer.

INSTRUCTIONS FOR USE

When using the coffee maker for the first time, wash it thoroughly, only
with water, and make at least 3 cups of coffee, discarding them (do not
drink them).

with water, and make at least 3 cups of coffee, discarding them (do not drink them).

For the use on induction, check the compatibility of the diameter of the coffee maker heater with the technical features of the hob.

Check the coffee maker is complete with all its components and is properly positioned, as shown in the figure. Check the coffee maker is complete with safety valve, funnel filter, gasket and filter plate and that these parts are in the correct position (5-6-3-2).

Do not drink the first 3 dispensing operations of coffee as they are necessary for enhancing the aroma of coffee at best.

Make sure the safety valve is not oriented towards the user.

Hand wash only without using detergents and abrasive sponges to preserve its features over the time.

Use ground coffee for Moka, that is with a suitable grinding, and never use fine grinding coffee.

Never press coffee into the funnel.

Store each part of the coffee maker completely dry and without closing it.

Replace the gasket, if worn. It is recommended to replace it at least once a year anyway.

Do not beat the funnel to remove the coffee, as it might get damaged or get ovalized, jeopardizing a proper sealing.

MAKING COFFEE

Remove the cup support base (7 - upper part of the without forcing the column.

2.

5.

ING COFFEE
Remove the cup support base (7 - upper part of the coffee maker) and, without forcing the column (1), rotate clockwise the heater (4 - lower part of the coffee maker) Fig. A.

Fill the heater (4) with cold water without exceeding the opening of the safety valve level (Fig. B).

Insert the funnel filter (6) into the heater (4). Fig. C.

Fill the funnel filter (6) with ground coffee for Moka, without pressing it down, taking care not to leave coffee powder on the rim of the coffee maker, Fig. D.

Assemble the cup support base (7) on the heater (4), by rotating the heater counterclockwise, and tighten well, without pressing too much and avoiding to force the column (1), Fig. E.

Put the coffee maker on the heat source with the cups underneath the column (1) on the cup support base (7), Fig.F. In case of flame, make sure that it does not go beyond the rim of the coffee maker. In case of induction/ electric/ceramic glass plate, do not use the highest heat.

BIALETTI INSPECTION SAFETY VALVE (5)

The Bialetti valve has been patented and designed to guarantee the use of the coffee maker in complete safety.

Using the coffee maker with drinking water might entail the risk of formation of lime scale in the hole of the valve, causing its clogging. To avoid clogging arising from lime scale, just move the small piston coming out of the valve along its axis during the normal washing operations, Fig. F. It is advisable to carry out this inspection periodically to ensure its proper operation. The safety valve is a protective element and should intervene only in conditions of abnormal operation or use of the coffee maker.

the coffee maker.
CLEANING AND MAINTENANCE

NELTE AND MAINIENANCE

Before carrying out cleaning and maintenance, wait for the appliance to cool down completely.

It is advisable to clean the coffee maker in all its parts on a regular basis, including the dispensing column, which must be free from coffee powder obstructions. obstructions.
After each use, wash with warm water without detergents and/or abrasive materials (the product CANNOT be put in the dishwasher).
Store the product perfectly dry in all its parts and not closed to prevent any build-up of stains/oxidations.
Regularly perform the decalcification procedure:
1. Fill the heater with water as per normal preparation.
2. Add two teaspoons of citric acid or vinegar.
3. Reassemble the product and, without adding any coffee powder, dispense once.

Reassemble the product and, without adding any coffee powder, dispense once.
 Throw away the solution obtained.
 Wash the coffee maker under running water and make coffee.
 Do not beat the funnel to remove the coffee, as it might get damaged or get ovalized, avoiding a proper sealing.
 Regularly check that the holes of the filter plate (2) are not obstructed, otherwise open them using a brush with delicate bristles or a needle.
 Periodically check the internal components and, in case of wearing or damage, replace them only with original Bialetti spare parts suitable for the modell used.

el used. Replace the gasket (3), if worn. It is advisable to replace it at least once a

year anyway.

DISPOSAL OF THE APPLIANCE

At the end of the life of the product, dispose it in a waste collection centre.

The adequate waste sorting and the correct disposal contribute to avoid negative impacts on the environment and public health and permit recycling of the materials which the product is made of.
