

Instructions

The Coffee Gator Hand Drip Coffee Maker delivers rich taste and aroma while maintaining the natural oils of ground coffee. Please wash the product before first use.

For your first cup, try 20g/0.7oz of medium/coarse ground coffee and 320ml/11oz of water (you can adjust these ratios to taste next time). Use a water temperature of 200°F / 94°C.

To make your brew

1. Place the metal filter cone inside the glass carafe then fill it with ground coffee. Make sure you place your coffee maker on a heat proof, nonslip, stable surface.
2. Pour hot water (not boiling) over the grounds in a slow circular motion until evenly soaked. Continue by pouring additional hot water until the cone is at full capacity.
3. Allow the brew to drip through the metal filter into the glass carafe. Add more water as required.
4. Remove metal filter cone. Pour coffee brew from glass carafe into your desired cup/mug.
5. Enjoy.

For more information, see our blog post 'Beginner's guide to pour over coffee' on our website.

Caution

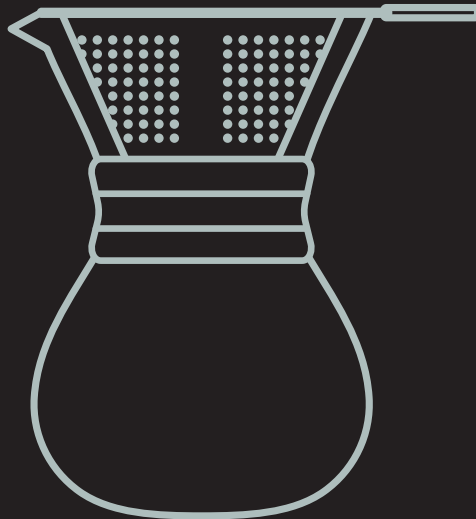

Ensure that hot water has completely passed through the metal cone filter before removing from the glass carafe.

- Hot water is a hazard to small children. Keep them away while using.
- Do not use if glass carafe is scratched, cracked or chipped.
- Not for stovetop use.
- Do not allow children to use this product.
- Avoid heavy scrubbing on your filter as it can damage the fine mesh.
