You can save your time by scanning the QR code to watch a video on how to install and program and reset the lock.

► Instructions for use

Warm tips: Please prepare 1 cross screwdriver and drilling machine before installment. 1. For the new locks just leaving the factory, if the equipment is not bound to a user, the lock can be opened by the keys of 123456+1.

2. In case of unlocking when a user has registered with the lock: Press a password of 6-10 digits + n key to unlock.

3. In case of unlocking, if the battery is running low, "short beep sound" will be prompted for 4 times in a 2-round cycle, and the keyword light will flash. When there is a prompt of battery low, please replace battery in a timely manner, and the door can still be opened

4. Please do not scratch the surface with corrosive or sharp items to prevent the lock surface from being damaged.

5. When the battery is running low or the electric part is out of order, an emergency key can be used to unlock outside, please take good care of the key and keep it in a safe place outdoors.

6. After assembly, the door must be kept in an open state so as to conduct commissioning and initialized parameter setting.

7. Operating temperature: -4°F/-20°C~+140°F/+60°C.
