door

sset (60mm or 70mm).
g the vertical center line of the ired height,and tape it to the door.
en start drilling.

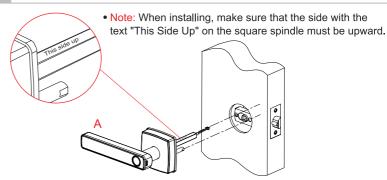

e:

ons: 60mm or 70mm, please ast it by yourself.

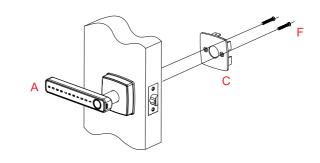

ore installing the latch (D) on the r, please make sure that the are inside the latch (D) is facing otherwise it cannot match the loor lock body (A).

single latch has TWO backset

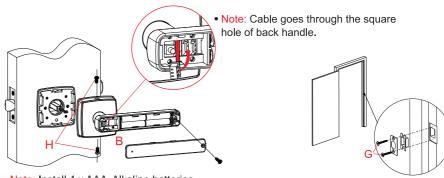

Step 4 Install outdoor unit (A)

Step 5 Install mounting plate (C) on the door

Step 6 Install indoor unit (B) on the door

• Note: Install 4 x AAA Alkaline batteries.

# Pair the Lock with Tuya App

#### 1. Tuya App Installation and Account Registration

- 1.1. Download the "Tuya Smart" App from Google play store or Apple store.
- 2.2. Install and register an account with your phone number or email.

#### Note:

The App supports Android 4.3 / IOS7.0 version and above.

Scan the QR code to download the App

## 2. Pair the lock with Tuya App

- 2.1. Turn on the Bluetooth on your phone.
- 2.2. Open Tuya Smart App on your phone, touch and activate the keyboard of lock. App will automatically search and display device that can be added. When you see the device (named "N1"), click "Add", click icon 
  and click "Done", the lock will be added successfully. You can rename the lock.

You can also add the lock manually: Open App - click "Add device" – "Security & Video Surveillance" under "Electrical" bar – click the icon "Lock(BLE)" – "Next" – click icon and click "Done" - the lock added successfully.

#### Note:

- 1. After successfully pairing, Tuya App on your phone becomes Administrator of the lock.
- 2. If you do not find the lock on App when pairing, please reset the lock first: Remove the battery cover on indoor lock body, keep pressing the reset button for about 5 seconds, keyboard lights up and long "Beep" once. Then you can pair the lock by following the steps above.
- 3. Once you pair the lock with your App account, the lock will not be able to link to other accounts, unless you remove the lock from your App.

Reset button

# Lock's Operation on App

After pairing the lock with App, you can find the lock on the home page of App. Click the lock N1 to enter operation page of lock. You can press the icon or input Dynamic Password on the lock to unlock.

 Note: When you unlock the lock with password, please press # after entering the password.

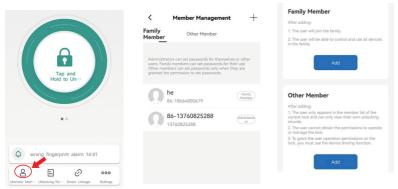

## 1. Member Management

(You can skip this setting first and directly set up fingerprint/password.)

There are two types of members in member management: family member and other member.

You (Administrator) can add users as family members or other members.

(Note: Whether it is a family member or other member, they need to register a Tuya account)

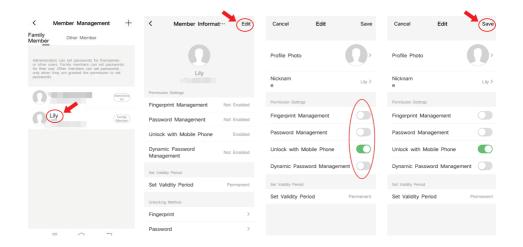

## 1.1. Administrator Manage Family Member

#### 1.1.1. Permission Settings

Administrator can turn on or off the management permissions of passwords, fingerprints, unlock with mobile phones, and dynamic password for family members (Note: via bluetooth, keep your phone close to the lock, if there is a Tuya gateway, it can be set remotely)

Follow the path below to set up permission:

Member Management—Name of family member—Edit—Permission Settings—Save

# 1.1.2. Set Unlock Methods

Follow the path below to set up fingerprints for family member:

Member Management—Name of family member—Fingerprint—Add Fingerprint—Start Capturing

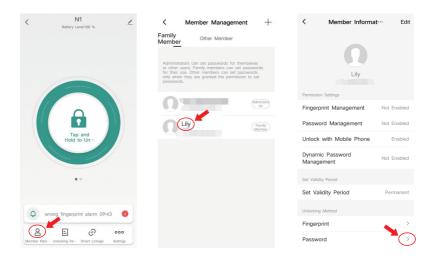

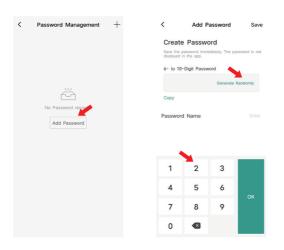

Follow the path below to set up password for family member:

Member Management—Name of family member—Password—Add Password —Create

Password

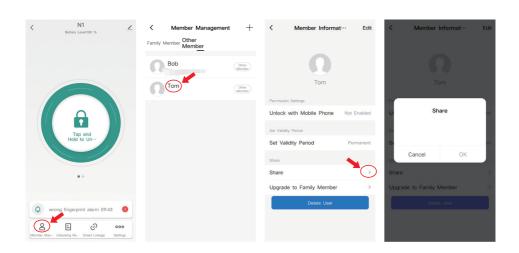

# 1.2. Administrator manage other member

## 1.2.1. Share the Lock on the APP

Only when the administrator shares the door lock on the APP with other members and enables the permission, other members can use the APP to unlock.

# Follow the path below to set up sharing:

Member Mmanagement—Name of other member—Share—Enter the Tuya account of other member—OK

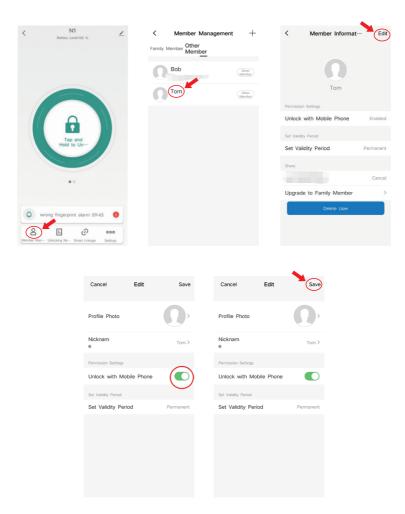

# 1.2.2. Permission Settings

Administrator can turn on or off the permission of unlock with mobile phones for other member (Note: via bluetooth, keep your phone close to the lock, if there is a Tuya gateway, it can be set remotely)

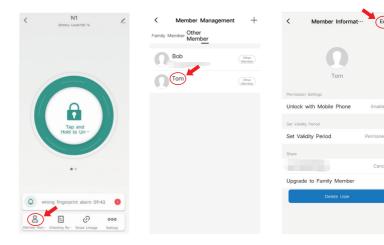

Follow the path below to set up permission:

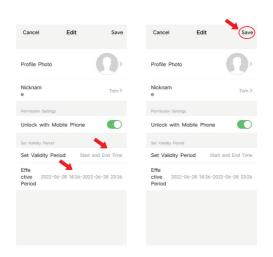

Member Management—Name of other member—Edit—Permission Settings—Save

# 1.2.3. Set Validity Period

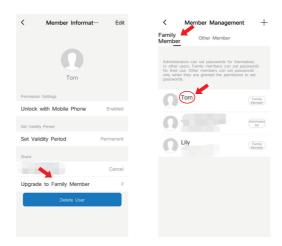

Valid period can be set to be permanent or timed.

## 1.2.4. Upgrade to Family Member

You can upgrade other member to family member.

#### 1.3. Family Member

- Validity: Once added, the permission of the family member is permanent until the administrator removes the member. Family member will be able to control and use all devices in the family.
- Unlock method: password, dynamic password, fingerprint, APP (Note: Via bluetooth, the phone needs to be close to the door lock, if there is a Tuya gateway, it can be set remotely.) If the administrator closes all unlock permissions, family member can no longer add his own unlock method.

Note: If the door lock is connected by other mobile phones via bluetooth at this time, it cannot be unlocked by bluetooth. Only when the door lock is not connected by other mobile phones via bluetooth can it be unlocked by bluetooth.

#### 1.4.Other Member

- -Validity: Administrator can set the valid period of permission for other members. Valid period can be set to be permanent or timed.
- -Unlock method: APP (Note: Via bluetooth, the phone needs to be close to the door lock, if there is a Tuya gateway, it can be set remotely.) If the administrator closes all unlock permissions, other member can no longer add any unlock method.

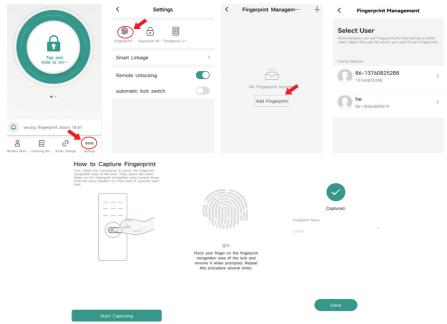

Note: If the door lock is connected by other mobile phones via bluetooth at this time, it cannot be unlocked by bluetooth. Only when the door lock is not connected by other mobile phones via bluetooth can it be unlocked by bluetooth.

## 2. Settings

You can set fingerprint / password / temporary password for unlocking on App.

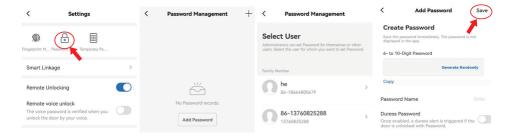

#### 2.1. Fingerprint

You can set your own fingerprint, or set fingerprint for member users by following steps: Fingerprint Management - Add Fingerprint - Select User - Start Capturing - Place your finger on recognition area of lock (need to repeat several times) - Name it & click Done

#### 2.2. Password

The password length should be 6~10 digits. You can set your own password, or set password for member users by following steps: Password Management - Add Password - Select the User – Create Customized or Random Password - Save

#### 2.3. Temporary Password

- Online Password (near the lock when setting)

Bluetooth should be turn on when you set the online password. The password can be customized or random password.

One-Time Password: The password can be used only once before it expires.

Periodic Password: The password can be used multiple times before it expires.

- Offline Password (need not near the lock when setting)

Bluetooth does not need to be turned on when you set the offline password. The password will be created randomly.

One-Time Password: The password is valid for 6 hours from generation and can be used only once before it expires.

Time-Limited Password: The password should be use at least once within 24 hours after it takes effect. Otherwise, the password will becomes invalid.

Clearing Code: It can only clear time-limited offline passwords used at least once.

## 3. Unlocking Records

To view unlocking records.

# Passage Mode

- The lock is auto-lock for default. It means that the lock will lock automatically 5 seconds after unlocking.
- Passage mode, the lock will not lock automatically (The door lock is unlocked) until you press # to lock or turn off passage mode.

#### 1. Turn on the Passage Mode

There are two methods to turn on the passage mode.

Method 1: Set to APP

Follow the path below to turn off the button of automatic lock switch:

Settings—Turn off automatic lock switch

Note: Your phone should be nearby the lock when setting passage mode via APP.

Method 2: Set on the lock

Step	Operation	System Prompt
