Product parameters

Size : 329.5 * 115.6 * 40MM

Wire length : 1.5m

Weight : 980G

Number of keys : 67key

Shaft type : hot plug mechanical shaft

Backlight : RGB

Side lights : RGB

Voltage : 4.4 ~ 5.25V

Current : 5V / 200mA

Interface : type-C

Operating frequency : 2402-2480MHZ 2402-2479MHZ

Bluetooth connection back time: less than or equal to 5S

Service distance : > 10m 360 °

Working mode : wired, 2.4G, Bluetooth 3.0, Bluetooth 5.0

RF RF power : the keyboard works with RF power of 30dBm

When the receiver works, the RF power is 30dBm

Sleep time : the device will automatically enter the sleep state 2 minutes after no operation, and press any key to wake up

Compatible system: Windows XP / Vista / 7 / 8 / 10 Mac

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
