

The background of the page features an abstract design. It includes several overlapping, rounded rectangular shapes in two shades of blue: a medium blue and a light blue. These shapes are arranged diagonally across the page. In the center, there is a rectangular area containing a blue-tinted image of a modern building with a glass facade, reflecting the sky and other structures. The building's lines are also oriented diagonally, creating a sense of movement and architectural structure.

【Tips and Warnings】

In order to emphasize the important information of the user manual, special attention should be paid when seeing the label , which indicates some important warnings and reminders.

【Important Tips】

Please read all instructions before installation, it is recommended that the machine be installed by a car audio professional.

 This machine is suitable for vehicle 12V power supply system (grounding wire is required), please do not install this machine in 24V vehicle, otherwise it will damage the machine.

 Do not repair the power fuse without professional guidance. Improper use of the fuse can cause damage to the machine or cause a fire.

 To avoid violating traffic rules, drivers cannot watch videos while driving and operating machines to avoid unnecessary accidents.

 For the sake of safety and to ensure the normal use of the product, please invite professionals to install, disassemble or repair the machine to avoid machine damage and accidents.

 Please avoid placing this product in a humid environment and water to avoid fire due to electric shock or other unnecessary damage.

Note: To prevent burning out the machine, please do not energize until you have connected the power cord correctly!

【Test】

A quick simple test before the installation is to confirm that the device is working normally and as expected. In case there is a wrong step in the subsequent installation, which causes it to fail to work. If you perform a successful test but the unit did not work after installing it please recheck the installation steps.

Test car stereo: ① The red and yellow wires of the car stereo combine together firstly and then connected to the positive pole of the 12V battery, ② The black wire is connected to the negative pole of the battery. ③ 2 seconds later, check the car stereo, if the screen is lighting up, it means the

car stereo is proper functioning.

【Installation】

- 1** Screw
fixed installation

- 2** Card position
fixed installation

- 3** Special frame
fixed installation

As shown in the figure above, there are three ways to install the machine, please choose one of them according to the actual situation. Of course, you can also re-install the new radio according to the installation method of the original car radio.

【Wiring】

(Note: The picture is for reference only, please refer to the actual product!)

1. Harness

2.Back interface diagram

- 1、 Power Cable
- 2、 RCA Input/Output
- 3、 8pin BREAK1.
BACK_CVBSIFI/BT
- 4、 2USB Cable
- 5、 Camera Input
- 6、 Radio antenna
- 7、 GPS Antenna

3.Rear view camera wiring (Optional)

1. Monitor (Not Included in the Package)
2. Camera Power Source
