Introduction to Parts

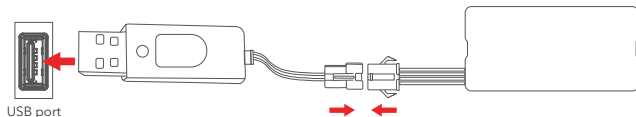

1. bullet bottle
2. gel-shot-bottle connector
3. power switch
4. trigger
5. battery compartment
6. lights
7. nozzle

How to Charge

Note: Before using the Dual-Shot Blaster, please charge the battery for up to 2 hours.

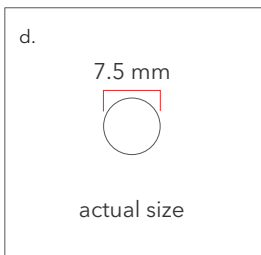

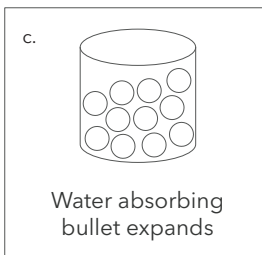

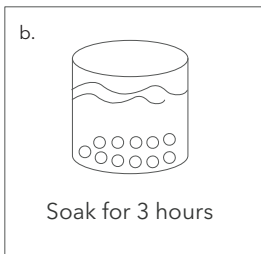

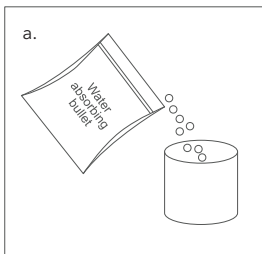

1. Connect the USB cable to the battery pack.
2. Connect the USB to a USB power source, such as a wall plug or a laptop.

3. When the battery pack is properly connected and the battery pack is charging, the USB connector's indicator light will go on. Once fully charged, the light will go off. Charging time is about 1.5 to 2 hours.
4. The battery pack will become warm when charging, which is normal.
5. Only use the original USB charging cable for charging.
6. When not using Dual-Shot Blaster, turn off the power switch to prevent energy drain and battery damage.

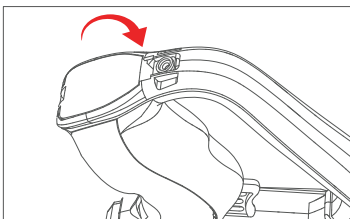

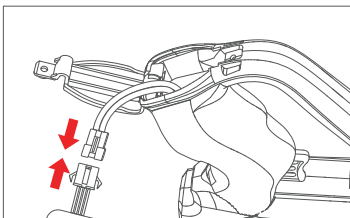

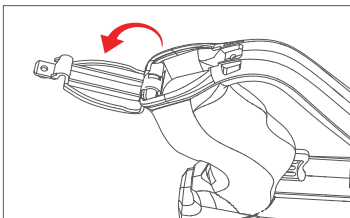

Growing the gel-shot bullets

1. Pour a small amount of the dry gel-shot bullets into a container.
2. Gel shot expansion times vary according to water temperature.
3. If you use cold water, please soak the gel shots for about 3 hours.
4. When using water that is 122° F (50° C), it will take about one hour for the gel shots to absorb water and grow.

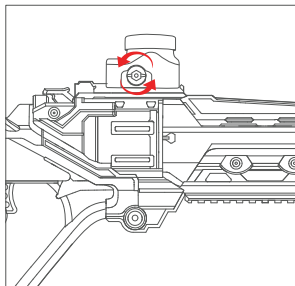

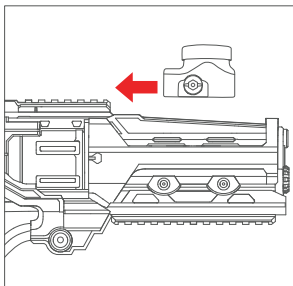

Installing the Battery

1. Unscrew and open the battery cover in the Dual-Shot Blaster's handle.
2. Connect the battery to the cable inside the Dual-Shot Blaster handle.
3. Fit the battery into the handle/battery compartment.
4. Close the battery-handle latch and twist the screw to lock.

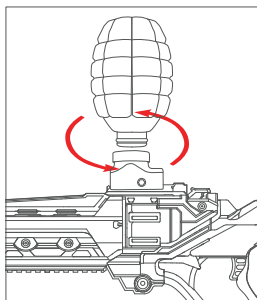

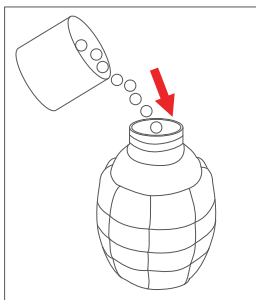

Installing the gel-shot bottle

1. Fit the bottle mount to the top of the Dual-Shot Blaster and making sure the holes align properly.

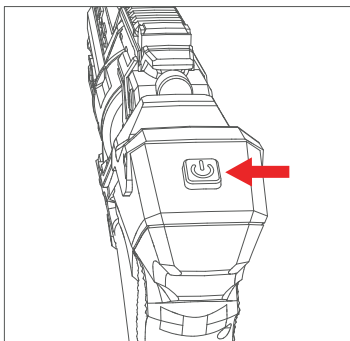

2. Fill the gel-shot bottle with the full-sized gel shots, and pour out any excess water from the bottle to avoid damaging the Dual-Shot Blaster.
3. Turn the Dual-Shot Blaster upside down and twist the gel-shot bottle to tighten it into the bottle mount.

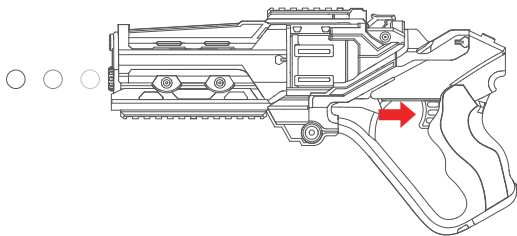

How to shoot with the Dual-Shot Blaster

1. Press on the power switch.

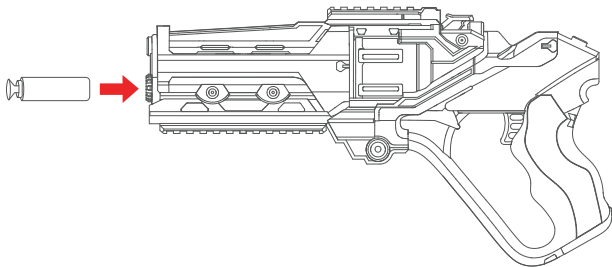

2. Pull the trigger once to fire a test shot.
3. Continuously pull the trigger to fire repeatedly.

NOTE: Make sure there are no foam darts in the Dual-Shot Blaster before firing the gel-shot bullets.

How to shoot the foam darts

1. Load the foam darts from the front, one at a time.

2. Pull the trigger once to shoot.

NOTE: Make sure there are no gel-shot bullets inside the barrel before shooting a foam dart.
