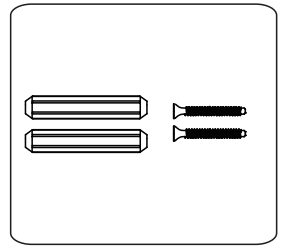
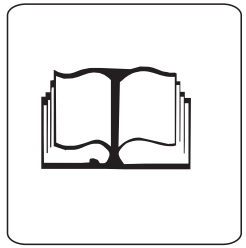
Adhesive Sticker



Screws & Anchors



User Manual

Content will vary according to your kit

The push button supplied with this kit is pre-programmed to operate with the doorbell. If it is not, see “Connect a Push Button” on page 5

Safety

⚠ Before proceeding with the installation, please note the following safety warnings:

• Always follow the manufacturer's advice when using power tools and wear suitable protective equipment (e.g. safety goggles) when drilling holes, etc.

• Before drilling holes in walls, check for hidden electricity cables and water pipes. The use of a cable/pipe locator is advisable if in doubt.

What You Should Know Before Installation

1.Test the operating range you desire. Choose an electric outlet at the height of 3.3 feet at least and plug in the receiver and take the button outside the door to test if it can work well within the range you have chosen.

2.Set a desired music (different or same one) for transmitters before installation. For music setting, see Operating Instructions.Doorbells have been paired and set to a default chime (Ding Dong) before leaving factory.

3.Please do not install transmitter on metal doors since it is hard for the signal to transmit.

4.Please take out the battery insulating strip before using.（(As picture ①）

5.Ensure all surfaces are clean by wiping the installation area with a clean cloth. Please note that the sticker will have poor adhesion if you attach it to a dirty or uneven surface. Sunlight or rain will also affect the adhesion over a longer period of time.

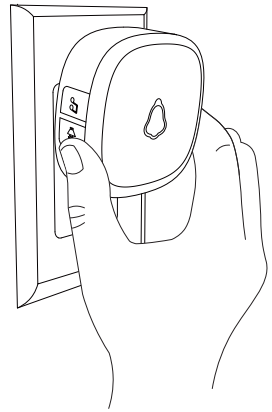
To return all settings to their default settings Hold down 【🔊】 and plug it into an outlet. After playing the beep 10 times, all settings will return to factory defaults.

Hold down 【🔊】 and Plug in



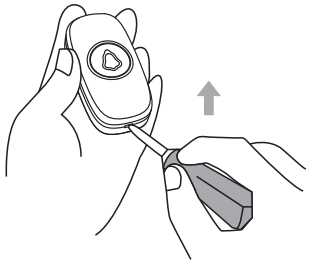
Installation

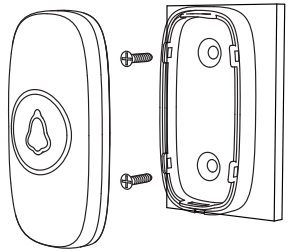
Choose a location that is not near a heat source or on something that moves (like a door). For non-mounting locations, choose a place where the doorbell will be easy to see and hear.

1.For Receiver:
Plug-in receiver: Just plug receiver into standard outlet in room.

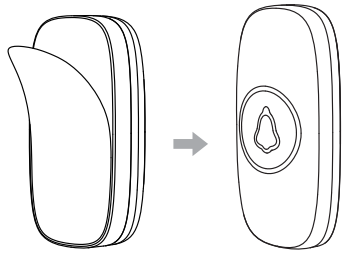
2.For Push button:
IMPORTANT:
Before installation, please test if the operating range you choose is working and set music if needed.
Before you drill any hole in the wall, please make sure there are not cables or pipes.
To install you will require a drill and cross-headed screwdriver.

① Open the Transmitter with screw driver and separate the front cover from the back cover. Penetrate the two standby holes at the back cover with two screws. Then fix the screws on the wall at suitable height.





② Or you can stick the Transmitter with the double-sided adhesive tape.



If you are not mounting the push button to the wall, place it where you want it.

Sound Level (typical)	0-120 dB	-
Battery Type	Plug in	CR2032
Battery Life (5 activations/day)	Up to 5 years	Up to 3 years
Rain Proof	N/A	IP55

Troubleshooting

If	Then
The doorbell does not work	1.The doorbell might be out of range; try the doorbell in a different location. 2.Reconnect the doorbell. See “Connect a Push Button” on page 5. 3.Check all the batteries and replace if needed. 4.Check if the LED on the transmitters is working when activated. 5.Check if the doorbell is muted. Check that the transmitter is linked with the chime.
Range is reduced	1.Metal structures including uPVC door frames can reduce the range. Don’t mount the the doorbell or doorbell push on or near metal structures. 2.Move the doorbell closer to the doorbell push button. Weak batteries will reduce range. In cold conditions (below 5°C), batteries may need to be replaced more often.

1 Year Limited Warranty

This product is warranted to the original purchaser only for a period of 1 year from the date of purchase for products damaged due to defect in workmanship and materials. Proof of purchase is required to obtain warranty service. Warranty is for replacement only. No service parts are available for these products. No other warranties are expressed or implied.Batteries are not covered under this warranty.
