Mount - Super Pull

The Super Pull mount easily mounts to the water pump hose, temperature and flow rate sensor or electric immersion heater and water system.

In the Box

Super Pull

Temperature Super Pull (200-2000)

Temperature Super Pull (200)

Temperature Super Pull (2000)

Flow Super Pull

Electric Immersion Heater Super Pull (200-2000)

Temperature Super Pull (200-2000)

Important Information:

1. Always use the maximum rated air water temperature and flow/pressure (see table).
2. Always use ratings and temperatures for water pipe ratings and flow/pressure (see table).
3. Use recommended air control for design air volume, standard design flow, the rated pipe or water pipe.
4. Water ratings are at 100°F (38°C) water and 100°F (38°C) water.

Introduction to Parts:

Indicator Light

Status	Indicator Light
Indicator is on (Red) LED is not responsive status	Indicator indicator light flashes slowly if circuit is properly wired. The indicator light stays on when correctly connected.
Indicator is off	Indicator light flashes (green only) and off.
None	Press the connection button for 5 seconds. The red button indicator will flash slowly showing the device is waiting for configuration.

How to Install

Note: Before you install the device, be sure the device has power and is
connected to the network. Set up your router mode and other features as
required.

Waterproof installation

1. Plug the waterproofing device into the front of the water pipe adapter.

21. Remove the water paper adapter into the straight pipe.

22. Tighten the water paper adapter using a hex key (not provided).

23. Wrap the existing seal tape around the front of the steps of the pipe.

19. Put the integrated circuit in the center pin socket. Then, slide the pins to the correct pins.

20. Turn on the breadboard with a power source (see below).

21. Run the program 1 - 10 to observe the behavior of the system.

Connecting to Power

Hardware connections

Plug the power connector into the power input on the rear of the device as shown.

Setup Steps

Hardware connections

1. Connect the power supply unit to the power input on the rear of the device.
2. Connect the power supply unit to the power input on the rear of the device.
3. Connect the power supply unit to the power input on the rear of the device.
4. Connect the power supply unit to the power input on the rear of the device.
5. Connect the power supply unit to the power input on the rear of the device.
6. Connect the power supply unit to the power input on the rear of the device.

How to Download the Microsoft app and Add Your Device

1. Download the Microsoft app by scanning the QR code or by visiting "Microsoft" on Google Play, Microsoft the app store.
