

POWERED SPEAKER SYSTEM
DBR series

DBR15 DBR12 DBR10

Owner’s Manual

In order to take full advantage of the DBR series' (referred to in this manual as DBR) superior functionality and enjoy years of trouble-free use, please read this manual before you begin using the product. After you have read the manual, keep it in a safe place for reference when needed.

- Please read the PRECAUTIONS on the reverse side of this manual before use.
- This manual uses example illustrations taken from the DBR12 if not otherwise specified.
- The illustrations as shown in this manual are for instructional purposes only, and may appear somewhat different from those on your device.
- The company names and product names used in this manual are the trademarks or registered trademarks of their respective companies.

Controls and Connectors

Rear

Bottom

Features

- **FIR-X tuning™**
Our proprietary sound-processing technology utilizing a linear-phase FIR filter delivers excellent sound quality with high resolution and a smooth frequency response that is unaffected by phase interference near the crossover point.
- **D-CONTOUR (Dynamic CONTOUR)**
D-CONTOUR optimizes the level of each frequency range according to the application to be used or the listener's preferences. There are two modes: an FOH/MAIN mode for use as a main speaker, and a MONITOR mode for use as a floor monitor.
- **Simple mixing function**
The DBR features simple mixing functionality, enabling you to select either a direct output of channel 1 (CH1) (parallel connection) or a mixed output of CH1 and CH2.
- **Various input/output connectors**
The comprehensive set of connectors—including XLR for a mixer, phone for a musical instrument, and RCA-pin for an MP3 player—provides maximum flexibility in use with a wide variety of applications.
- **Light weight, high power**
A newly developed power supply and amplifier has enabled compact size and light weight, as well as powerful output.
- **Advanced protection functionality**
DSP-controlled advanced protection functionality promotes optimum reliability even in challenging environments.

Included Accessories

- AC power cord
- Technical Specifications (English only): includes specifications, block diagram, and dimensions.
- Owner's manual (this leaflet)

1 Input jacks (CH1 and CH2)

These are balanced combo jacks that support both XLR and phone plugs (both CH1 and CH2), and RCA-pin plugs (CH2 only). For the combo jacks, connect a mixer, microphone, or digital musical instrument such as a keyboard. For RCA-pin jacks, connect a device such as an MP3 player or a CD player. For devices with high level signals such as a mixer, connect to CH2, or connect to CH1 then set the [MIC/LINE] switch (3) to [LINE].

2 [LEVEL] knobs

Adjust the level of each input jack (1).

3 [MIC/LINE] switch

Set this switch to [MIC] or [LINE] for the CH1 jack, depending on the level of the input signal. For low-level signals (such as microphones), set the switch to [MIC]. For high-level signals (such as mixer), set the switch to [LINE].

4 Output switch

Selects the output signal sent to the output jack (5).
[CH1 THRU]: Delivers the direct output signal of CH1 only. Signal from CH2 will not be output.
[CH1+2 MIX]: Outputs the mixed signals of CH1 and CH2.

5 Output jack

This is a balanced XLR jack. This can be used to connect another DBR speaker. Outputs the signal selected by 4 output switch.

6 [LIMIT] indicator

Indicates (lit in red) that the limiter is on when the output voltage of the amplifier has exceeded the maximum level, or when excessive integral power consumption is detected. If this indicator stays lit, lower the input level.

Note Integral power consumption refers to the sum of power provided to the speaker driver per unit time.

7 [SIGNAL] indicator

Indicates (lit in green) when an audio signal exceeding the threshold has been detected.

8 [PROTECTION] indicator

Indicates (lit in red) when the protection circuit is active. The protection circuit will be activated and the speaker outputs will be muted in the situations listed below.

- If amplifier overheating is detected
- If overcurrent is detected
- When turning the power on; the protection circuit will be activated for a few seconds to prevent noise.

The indicator turns off when the power supply has started normally.
If the protection circuit has engaged, waiting until the amplifier cools down or powering off and on again will return to normal operation. If the unit does not return to normal operation, please contact your Yamaha dealer.

9 [POWER] indicator

Indicates (lit in green) when the [I/ψ] (power) (15) switch is turned on.

10 [D-CONTOUR] indicator

Indicates (lit in yellow) when the [D-CONTOUR] switch (11) is set to [FOH/MAIN] or [MONITOR].

11 [D-CONTOUR] switch

Selects one of the D-CONTOUR (Dynamic CONTOUR) presets.
[FOH/MAIN]: Boosts the high and low frequency components so that the frequency response is suitable for a main speaker.
[MONITOR]: Reduces the low frequency range, which could otherwise tend to be boomy if the speaker is set directly on the floor. This enables you to hear mid and high frequency ranges clearly when using as a floor monitor.

[OFF]: Turns off D-CONTOUR. This is a generic frequency response setting.

12 [HPF] switch

Selects the cutoff frequency of the high pass filter. If you set this switch to [120Hz] or [100Hz], the low frequency components below each threshold will be cut. If you use the unit alone, set this switch to [OFF]. If you plan to use the unit along with a subwoofer, we recommend that you set this switch to [120Hz] or [100Hz].

13 Vent

The unit contains a cooling fan. Since the air for cooling is taken in and expelled here, be careful not to block this vent.

14 [AC IN] socket

Connect the supplied power cord here. First connect the power cord to the unit, then plug it into an appropriate AC power outlet.

CAUTION

Turn off the power before you connect or disconnect the power cord.

15 [I/ψ] (power) switch

Turns power to the unit on [I] or off [ψ]. First, turn on the power of the connected sound source (external device), then the unit. When turning off the power, reverse the order by turning off the power of the unit first and then the connected sound source (external device).

CAUTION

Even when the switch is in the off position, a small amount of electricity is still flowing to the unit. If it will not be used for an extended period of time, therefore, be sure to unplug the power cord from the wall AC outlet.

- Note**
 - Rapidly turning the unit on and off in succession can cause it to malfunction. After turning the unit off, wait for about 5 seconds before turning it on again.
 - If you are using multiple units, turn on the power to each unit one by one. If you turn on the power to multiple units simultaneously, a temporary drop in the power voltage may occur, possibly resulting in abnormal operation of the units.

16 Screw holes (M8)

Use these M8 size screw holes for installing separately sold brackets or commercially available eye bolts.

17 Pole socket

This socket adapts to commercially available speaker stands and speaker poles of 35 mm diameter.

Setup Examples

Simple system with a single DBR

This example illustrates the system when connecting directly to a microphone, musical instrument, or background music source without using a mixer.
Main application: small-sized live venue, presentations, restaurants

Note For CH2, inputs to the combo jack and to the RCA pin jacks will be mono mixed at a fixed balance. If you want to change the balance, adjust the volume of the connected sound source.

System with two DBRs and subwoofers

This system is the most suitable for a main speaker system. If desired, you can add another DBR to create a floor monitor system.
Main application: small-sized live venue, house of worship, event site

Note We recommend to use Yamaha DXS series (referred to in this manual as DXS) as a subwoofer. In this case, we recommend that the DBR's HPF cutoff frequency and the DXS's LPF cutoff frequency are set to the same settings; however, you can adjust it as desired.

Floor monitor system

This system is suitable for a performer's monitoring system. For use as a vocal monitor, set the [D-CONTOUR] switch to [MONITOR].
If necessary, you can additionally connect up to four speakers in parallel. In this case we recommend that the signal is input to CH1 and the output switch is set to [CH1 THRU].

Troubleshooting

Symptom	Possible causes	Possible solution
Power does not turn on.	The power cord is not connected properly.	Connect the power cord all the way in so that it is firmly in place.
Power suddenly went off.	The protection system has been activated, shutting down the power supply.	Turn off the power, wait until the amplifier cools down, and then turn on again.
No Sound.	The cable is not connected properly.	Connect the cable all the way in so that it is firmly in place.
Sound is interrupted suddenly.	The protection circuit has been activated, muting the output.	Wait until the amplifier cools down. If the unit won't automatically reset itself, turn off the power, and then on again.
Sound howls (feedback).	A microphone is directed toward the speaker.	Aim the speaker away from the area where the microphone picks up sound.
	Sound is amplified too much.	Lower the volume of input device and locate the microphone more closely to the sound source.
Each speaker sound differs (if multiple speakers are used).	Settings for each speaker differ.	Set the [HPF] switch and [D-CONTOUR] switch of each speaker to the same positions.
Sound is distorted.	The [LIMIT] indicator is off.	When the [MIC/LINE] switch is set to [MIC], and even if you lower the volume fully the sound is still distorted, set the switch to the [LINE] position. If the sound is still distorted even if the switch has been set to [LINE], lower the volume of the connected input devices.
	The [LIMIT] indicator is on.	Turn the [LEVEL] knob to lower the output level to a point so that the [LIMIT] indicator lights only occasionally.
The microphone volume is too low.	The [MIC/LINE] switch is set to [LINE].	Set the [MIC/LINE] switch to the [MIC] position.
Low and high frequency are unbalanced.	The output limiter is active.	Lower the input level or the output level until the [LIMIT] indicator lights occasionally.

If any specific problem should persist, however, please contact your Yamaha dealer.

Installation Examples

CAUTION

- Before doing any installation or construction work, consult with your Yamaha dealer.
- For optimum safety, the installation should be checked thoroughly at regular intervals. Some fittings may deteriorate over extended periods of time due to wear and/or corrosion.
- When choosing the installation location, suspension wire and mounting hardware, make sure all are strong enough to support the weight of the speaker.
- Make sure to take measures to prevent the speaker from falling down in the event of a installation failure.
- When installing the safety wire to the wall, install it higher than the wire's attachment point on the speaker, with as little slack as possible. If the wire is too long, and the speaker happens to fall, the wire may snap as a result of too much strain.

Yamaha cannot be held responsible for damage or injury caused by insufficient strength of the support structure or improper installation.

Installation using separately sold Yamaha speaker brackets

Attach the bracket to two screw holes at the bottom of the unit using commercially available screws (M8 x 16 mm) or eye bolts (M8 x 15 mm). For details on installing the bracket, refer to the corresponding manual.

Using the BWS251-300 or BWS251-400 wall mounting bracket

Using the BCS251 ceiling bracket

Using the BBS251 baton bracket

Note In order to prevent the unit from falling down, attach the safety wire as shown in the illustration.

General Specifications

General Specifications		DBR15	DBR12	DBR10
System Type		2-way, Bi-amp Powered Speaker, Bass-reflex Type		
Frequency Range (-10dB)		49 Hz~20 kHz	52 Hz~20 kHz	55 Hz~20 kHz
Coverage Angle (Horizontal x Vertical)		H90° x V60° Constant Directivity Horn		
Measured Maximum SPL (Peak) IEC Noise@1m		132 dB SPL	131 dB SPL	129 dB SPL
Crossover		2.1 kHz	2.1 kHz	2.1 kHz

	HF	1.4" Voice Coil, Compression Driver	1" Voice Coil, Compression Driver	1" Voice Coil, Compression Driver
Dimensions (WxHxD, Including Rubber Feet)		455 x 700 x 378 mm (17.9" x 27.6" x 14.9")	376 x 601 x 348 mm (14.8" x 23.7" x 13.7")	376 x 601 x 348 mm (14.8" x 23.7" x 13.7")
Net Weight		19.3 kg (42.6 lbs)	15.8 kg (34.8 lbs)	10.5 kg (23.2 lbs)
Handles		Side x 2		Top x 1
Pole Socket		φ35 mm Bottom x 1		
Rigging Points		Bottom x 2, Rear x 1 (Fit for M8 x 15 mm)		Bottom x 2 (Fit for M8 x 15 mm)
Optional Speaker Brackets		BBS251, BCS251, BWS251-300, BWS251-400		
I/O Connectors	Input	INPUT1: Combo x1, INPUT2: Combo x 1 + RCA-pin x 2		
	Output	XLR3-32 x 1 (CH1 Parallel Through or CH1+CH2 Mix)		
Input Sensitivity (Level: Center)		INPUT1: LINE: +10 dBu, MIC: -22 dBu, INPUT2: +10 dBu		
Maximum Input Level		INPUT1: LINE: +24 dBu, MIC: -8 dBu, INPUT2: +24 dBu		

Specifications and descriptions in this owner's manual are for information purposes only. Yamaha Corp. reserves the right to change or modify products or specifications at any time without prior notice. Since specifications, equipment or options may not be the same in every locale, please check with your Yamaha dealer.

Securing the screws and eye bolts

- Insert the screw or eye bolt through the washer to attach them.

Installation using eye bolts

Attach commercially-available eye bolts (M8 x 15 mm) to the screw holes located at the bottom (two locations) and on the upper rear (one location, only for DBR15 and DBR12). Keep in mind that you will need two points at the bottom to suspend the unit.

Note Make sure to use eye bolts according to the standards and safety regulations in your area.

NOTICE

The strength of an eye bolt differs depending on the suspension angle. Make sure to use eye bolts within a range of 0 to 45 degrees from a right angle (as shown).

Correct: Within 45° from a right angle

Incorrect: Do not suspend the eye bolts as shown in the illustrations below.

PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe place for future reference.

WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

Power supply/power cord

- Do not place the power cord near heat sources such as heaters or radiators, and do not excessively bend or otherwise damage the cord, place heavy objects on it, or place it in a position where anyone could walk on, trip over, or roll anything over it.
- Only use the voltage specified as correct for the device. The required voltage is printed on the name plate of the device.
- Use only the supplied power cord/plug.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.
- Be sure to connect to an appropriate outlet with a protective grounding connection. Improper grounding can result in electrical shock, damage to the device(s), or even fire.

Do not open

- This device contains no user-serviceable parts. Do not open the device or attempt to disassemble the internal parts or modify them in any way. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

Water warning

- Do not expose the device to rain, use it near water or in damp or wet conditions, or place on it any containers (such as vases, bottles or glasses) containing liquids which might spill into any openings. If any liquid such as water seeps into the device, turn off the power immediately and unplug the power cord from the AC outlet. Then have the device inspected by qualified Yamaha service personnel.
- Never insert or remove an electric plug with wet hands.

Fire warning

- Do not put burning items, such as candles, on the unit. A burning item may fall over and cause a fire.

If you notice any abnormality

- When one of the following problems occur, immediately turn off the power switch and disconnect the electric plug from the outlet. Then have the device inspected by Yamaha service personnel.
 - The power cord or plug becomes frayed or damaged.
 - It emits unusual smells or smoke.
 - Some object has been dropped into the device.
 - There is a sudden loss of sound during use of the device.
- If this device should be dropped or damaged, immediately turn off the power switch, disconnect the electric plug from the outlet, and have the device inspected by qualified Yamaha service personnel.

CAUTION

Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the device or other property. These precautions include, but are not limited to, the following:

Power supply/power cord

- When removing the electric plug from the device or an outlet, always hold the plug itself and not the cord. Pulling by the cord can damage it.
- Remove the electric plug from the outlet when the device is not to be used for extended periods of time, or during electrical storms.

Location

- Do not place the device in an unstable position where it might accidentally fall over.
- Do not block the vents. This device has ventilation holes at the rear to prevent the internal temperature from becoming too high. In particular, do not place the device on its side or upside down. Inadequate ventilation can result in overheating, possibly causing damage to the device(s), or even fire.
- When installing the device:
 - Do not cover it with any cloth.
 - Do not install it on a carpet or rug.
 - Do not use the device in a confined, poorly-ventilated location.
- Inadequate ventilation can result in overheating, possibly causing damage to the device(s), or even fire. Make sure that there is adequate space around the device: at least 30cm above, 30cm at the sides and 30cm behind.
- Do not use the speaker's handles for suspended installation. Doing so can result in damage or injury.
- Do not hold the bottom of the device when transporting or moving it. In doing so, you may pinch your hands under the device, and result in injury.
- Do not press the rear panel of the device against the wall. Doing so may cause the plug to come in contact with the wall and detach from the power cord, resulting in short circuiting, malfunction, or even fire.
