Work. Flow. Home.

# Galena

User Manual

Thank you for choosing Galena!  We designed this versatile and stylish cabinet with your needs in mind, combining functionality and aesthetic appeal to fit seamlessly into any space.

## Cabinet Care and Safety Guidelines

Designed for indoor use only.
Ideal room temperature is 22°C,
the optimal humidity is between 40-65%.

Cabinet total weight capacity is 200lbs / 90kg.

Do not use bleach, harsh chemicals, or abrasive cleaners on the cushion as they can damage the fabric.
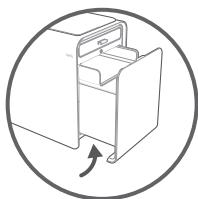

For cushion stains, use a mild detergent mixed with water. Dampen a cloth with the solution and gently blot the stained area. If any liquids spill onto the painted surface, immediately use a soft cotton cloth that is 70-80% dry to clean it.
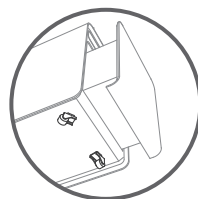

## Wheel Locking Instructions

The two wheels located beneath the door of the Galena can be locked for stability.

Open the bottom drawer, reach into the bottom to locate the front wheels.

Press the pedal down to engage the lock. To unlock, lift the pedal up.

As these are swivel casters, the locking pedal may be positioned at any angle on the wheel.

## Disclaimers

- Lock the front wheels when the cabinet is stationary to prevent unwanted movement.
- Keep the keys in a safe place and avoid forcing the lock to prevent damage.
- Do not store valuables in the drawer as the lock is not designed for high security.
