

CONDENSATE REMOVAL TANK PUMP

Product Features

- Compact design that doesn't compromise on reservoir capacity.
- Patent pending impeller configuration
- Unique trap and filter minimizes biofilm build up in the main section of the reservoir (1/8" lip catches debris before water enters the reservoir)
- IP24 splash-proof—superior fan assisted cooling system to the motor allows for semi-enclosed casing
- Reservoir can be easily removed for routine maintenance while the pump remains fixed in place
- Single-screw quick release to reservoir
- Max. flow rate: 135 US GPH (115v, 60Hz @ 0ft head)
- Max. recommended head: 21ft
- Tank capacity: 0.45 US Gal
- Built-in bubble level, ensures easy installation every time
- Max. temp. 140°F with pH 2.2+ water
