II Connect the lock with App

i App Installation

1. Download and install the "Smart Life" APP from the application market or scan the QR code.
2. After installation, follow the prompts to register and log in.

ii Connect the lock with smart life app:

1. Open the Bluetooth and Location of your smartphone.
2. Waken up the key board and long click “#” on the lock to enter system, verify administrator and press “6” to enter networking mode.
3. Open smart life app, the device will automatically pop up, the device name is "WF-016", please add the device and modify device name.

iii Family Management

1. Family Member

Click "Family" on the unlock interface and select "+" in the upper right corner of the interface to enter "Add Member" interface. Input member's name and his account of smart life app, then select his family role (common member or administrator). Then click "save", and he will receive your invitation.

When your family member receive your invitation, open smart life app, click "Me"→"Home Management"→Find the family and accept the invitation, then they have been shared the lock.

After Joining, return to the main interface, and select the family name in the list on the upper left corner, then the lock device will shown in the main interface.

How to delete Family Member: in the main interface of the smart life app, click “ME” → “Home Management” → click “Family Member Name” → click “Remove Member”.

2. Enter User Information

Click "Family" on the unlock interface to enter "Family-Associated Unlocking" interface, then select your family member and enter unlocked information(fingerprint and password). You also can set valid time(**the**

timed users).

iv Temporary Unlocking Management

1. Add Temporary Unlocked Password

Click "Temporary" on the unlock interface to enter "Add Temporary Unlocking" interface., select "Password". You can set 8-12 bits temporary password (also can generate randomly), then set the valid time and save it.

Also can set dynamic password (valid time is 5 minutes), click "Obtain Password", and share it to your family or friends after generating.

2. Add Temporary Unlocked Mobile Phone(smart life app unlock)

Click "Temporary" on the unlock interface to enter "Add Temporary Unlocking" interface, select "Mobile Phone". You can set "time-limited" or "one-time" unlocking.

Set "time-limited" unlocking, please enter users' account of smart life app(**phone number or email address**), and set the valid time, then click "send" to finish.

Set "one-time" unlocking, please enter users' account of smart life app(**phone number or email address**), then click "send" to finish. [**Notice: the valid time is 1 hour, and it just can unlock one time.**]

Then the receiver can open his smart life app, our lock will shown on the main interface. Please open Bluetooth and location of his mobile phone to connect the lock. Click the lock device name to enter the unlocking interface to open the lock. There is a valid time shown on the unlocking interface. [**Notice: if you have set a one-time unlocked user, he just can open the lock 1 time within 1 hour.**]

▼ Manage “More”

Click "More" on the unlock interface to enter "More" interface to set more functions you need.

1. Click “Smart Scenes” to enter “scene” interface, you can open “Family Go Home” function, also can open “Door Lock Alarm” function. Besides, you can custom some functions which you need.
2. Open/Close Auto Lock(close it, the lock will be in normal open mode)
3. Set the time of Auto Lock.
4. Set the Volume of Lock.
5. Choose Language of Lock

vi Unlocking Record / Alerts

Click Doorbell Icon on the unlock interface to enter “Logs” interface to check Unlocking Records or Alerts.

vii Restore Factory Setting

On the unlock interface, click the “edit” on the top right corner, then click “remove device”, and select “Disconnect and wipe data”, then click “confirm”, the lock will broadcast: “factory reset”. [**Notice: all users' information will be deleted, including the fingerprint users and password users which set on the lock.**]

III Installation

i If you can't fully insert the square rod into the front handle:

please use a screwdriver to toggle the installed hole of the front handle.

(if you need to cut short the square rod according your door thickness, please cut off it from the big side).

ii if your door is **Left Opening Door**:

1. Please install the screw of the front handle to **left hole.(in initial state, the lock is for left opening door)**

2. Before installation, please insert the square rod into the front handle, and rotate the square rod **along** the direction pointed by the arrow until it cannot be moved. please keep the rod in the final position(it can be moved) when installing.

iii if your door is **Right Opening Door**:

1. Please install the screw of the front handle to **right hole**. (in initial state, the lock is for left opening door)
2. Before installation, please insert the square rod into the front handle, and rotate the square rod **against** the direction pointed by the arrow (**counter clockwise**) until it cannot be moved. please keep the rod in the final position(it can be moved) when installing.

iv The lock is suited for 35-60mm door thickness. But the standard square rod is just suited for the door thickness of 40-45mm.

1. If your door thickness is less than **40mm, (is 35-40mm)**, you have to cut short the square rod according to your door thickness. (**please cut short from the big side**)
2. If your door thickness is more than 45mm(**is 45mm-60mm**), you have to insert the spring into the rear handle.

v You can scan the following QR Code to refer the video about how to adjust the lock , how to install and operate.

IV FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference,
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
