OFF/ON

Bluetooth Mode:
1. The switch is activated to the right and is in the On state
2. Press and hold the FN+1/2/3 key combination for 3S to put the keyboard into pairing mode, 1/2/3 indicator flashes rapidly, 1/2/3 indicator stays on for 3S after connecting the device.
3. If no device is connected, the indicator goes off and the keyboard goes into hibernation.

2.4G Mode:
1. Switch to the right to activate the ON state, press and hold the FN + 4 key combination 3S, so that the keyboard into the 2.4G mode.
2. The indicator light flashes rapidly, insert the 2.4G dongle, and exit pairing after successful pairing,
3. Exit pairing mode after 30 seconds, if no paired device is found, the indicator light goes off and the keyboard enters hibernation.

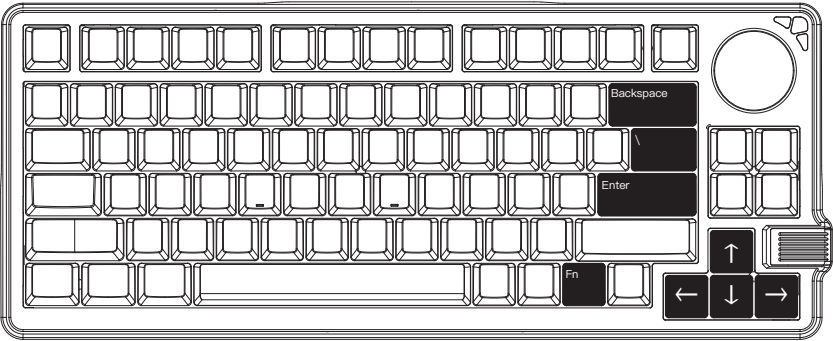

Wired Mode:
Switch to the left to activate the Off state, plug in the USB–C cable, press and hold the FN+5 key combination 3S to put the keyboard into wired mode.

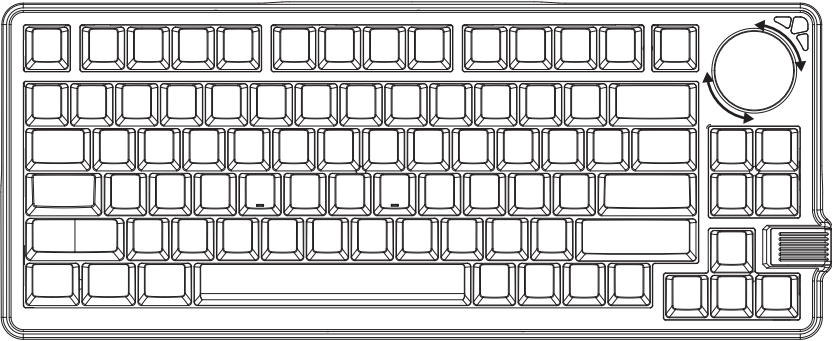

Warning: If you are changing the keyboard mode to wireless under the wired mode and then, when you press FN+123/4, the keyboard battery will show at 1%. Don't worry, this problem only happens if you the cable plug in the keyboard, and the battery life is normal.
Notes: Bluetooth mode and 2.4G mode will have three states when entering:
Searching, Pairing, Connected
