Where is USB?

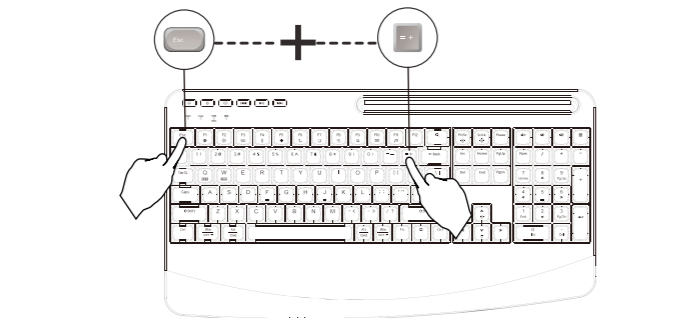

Take out the USB from the back of the mouse. The mouse and keyboard share one USB.

How to set up

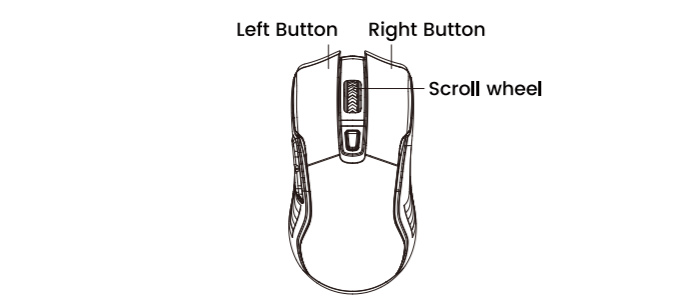

Step 1: Please put the USB receiver into your computer. Step 2: then turn on the keyboard and mouse. Note: The keyboard and mouse will automatically connect to the computer, no driver needed.

What to do if the keyboard loses connection with USB?

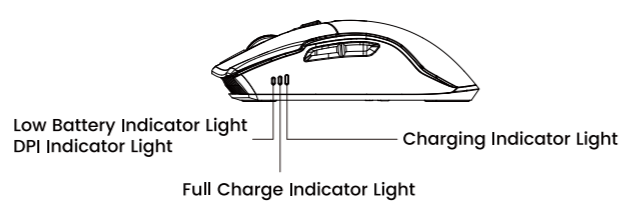

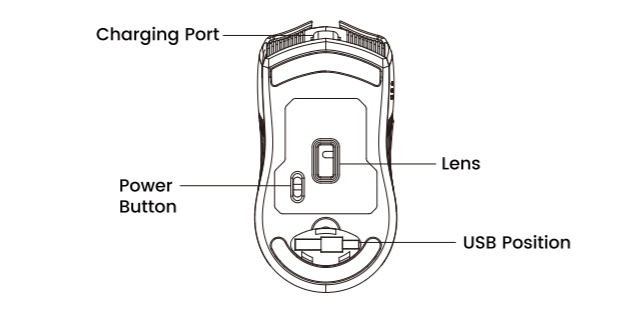

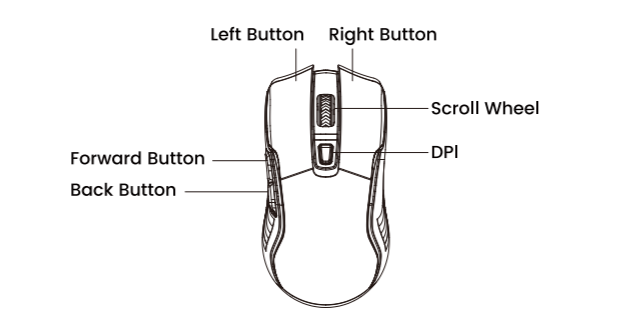

Pairing method: Long - press the "ESC" + "=" keys for three seconds until the red light flashes. Then, immediately plug in the receiver.

What to do if the mouse loses connection with USB?

Press and hold the left, middle, and right buttons of the mouse for 3-5 seconds, then plug the USB into the computer.

Voltage:	3.7V

FAQ

- Q1:** How to fix keyboard delay or sticking?
A1:
- Check for 2.4GHz devices (e.g., router) nearby.
- Ensure the keyboard is fully charged.
- Remove any full-metal casing blocking the signal.
- Q2:** What to do if keyboard/mouse won't charge?
A2:
- Check charging port connection; replace the cable.
- Try a different USB port. Contact us if issue persists.
- Q3:** Backlight not working?
A3:
- Charge for 30 mins, then re-insert USB receiver.
- Restart keyboard and mouse.
- Q4:** Where's the USB receiver?
A4:
- It's under the mouse. Keyboard and mouse share one receiver.
- Q5:** How long do the keyboard and mouse last on a single charge?
A5:
-The keyboard can last about 50 hours with the backlight on, which is roughly one week of use, and up to four months without the backlight.
-The mouse lasts about 30 hours with the backlight on and around 100 hours without the backlight.

FCC Statement

This equipment has been tested and complies with the limits for Class B digital devices under Part 15 of FCC rules, designed to protect residential environments from harmful interference. The device emits radio frequency energy during use, and improper installation as per instructions may cause interference with wireless communications. If interference is detected (testable by power cycling), please take the following actions:

1. Adjust the position of the receiving antenna.
2. Increase the distance between the device and the receiver.
3. Connect the device to a different circuit outlet than the receiver.
4. Consult a technician or dealer for assistance.

Modifications not approved by the compliance responsible party will void the authority to operate the equipment. Operation is subject to two conditions:

The device must not cause harmful interference.
The device must accept any interference received, including that affecting normal operation.
