FCC ID

This equipment has been tested and complies with the limits for Class B digital devices under Part 15 of FCC rules, designed to protect residential environments from harmful interference. The device emits radio frequency energy during use, and improper installation as per instructions may cause interference with wireless communications. If interference is detected (testable by power cycling), please take the following actions:

- Adjust the position of the receiving antenna.
- Increase the distance between the device and the receiver.
- Connect the device to a different circuit outlet than the receiver.
- Consult a technician or dealer for assistance.

Modifications not approved by the compliance responsible party will void the authority to operate the equipment. Operation is subject to two conditions:

The device must not cause harmful interference.
The device must accept any interference received, including that affecting normal operation.
