Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

Voltage: 120 V~

Frequency: 60 Hz

Power: KMT2115 900 W and KMT4115 1800 W

NOTE: The Toaster has a 3-prong grounded plug. To reduce the risk of electrical shock, this plug will fit in an outlet only one way. If the plug does not fit in the outlet, contact a qualified electrician. Do not modify the plug in any way.

Do not use an extension cord. If the power supply cord is too short, have a qualified electrician or service technician to install an outlet near the appliance.

The cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over unintentionally.

GETTING STARTED

Before using the Toaster, check the Extra-Wide Slots and remove any packing or printed material that might have fallen inside during shipping or handling. Do not probe inside the Toaster with a metal object. You may see light smoke the first time you use the Toaster. This is normal. The smoke is harmless and will soon disappear.

PRODUCT USAGE

MAKING TOAST

Shorten cord, if necessary, by wrapping cord under the base. The Toaster's feet are tall enough to allow the cord to exit from under any side of the Toaster.

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

1. Plug into a grounded 3-prong outlet.

2. Turn the Shade Control Knob to select the degree of brownness you want. Turn the Shade Control Knob to the right for darker toast or to the left for lighter.

NOTE: Different types of bread and their moisture levels may require different shade settings. For example, dry bread will brown more rapidly than moist bread and will require a lighter setting.

3. Insert bread or other food to be toasted in slot(s).

NOTE: For even toasting on 2-slot models, toast only one bread type and thickness at a time. If toasting two different types or thicknesses of bread with 4-slot models with Dual-Independent Controls, be sure to toast only one bread type in each pair of slots.

If toasting bagels, be sure to press the Bagel Button. See “Toasting Bagels” section.

4. Press down on High-Lift Lever to start the toasting cycle. The toast will rise automatically at the end of the cycle and the Toaster will turn off.

TIP: For smaller items, lift up on the High-Lift Lever to raise toast above the top of the Toaster.

5. To cancel toasting at any time, press Cancel Button. The Toaster will raise the toast and turn off.

SPECIAL TOASTING FUNCTIONS

Toaster features a special setting for bagels, ensuring optimal heat and time for the best results. The heating elements will adjust to nicely toast the inside of a cut bagel without burning the outside surface.

1. Insert bagels with the cut side facing in, as shown.

2. With the Shade Control Knob set to the desired level of brownness, press down on the High-Lift Lever to start the toasting cycle.

3. Press the Bagel Button. The bagel(s) will rise automatically at the end of the cycle and the Toaster will turn off.

1. Unplug the Toaster and let it cool before cleaning.

2. Grasp the center of the Crumb Tray then slide it out. Shake the crumbs into a waste container. It is recommended that the Crumb Tray be emptied after each use. Crumb Tray is hand-wash only.

IMPORTANT: The tray will be hot immediately following a toasting cycle.

3. Wipe the Toaster with a soft, damp cotton cloth. Do not use paper towels, abrasive cleansers or liquid cleaning products. Do not immerse the Toaster in water.

NOTE: If grease or oil splatters on the Toaster, wipe splatters away immediately using a clean, damp cotton cloth.
